Representation Description :

This is an open space, carrying high environmental and archeological importance. Not to mention, it is the only street left for Mosta's inhabitants to take long walks on and without the chaos other streets afford (i.e. the built environment).

Although it has been moved into the scheme some years ago, it shouldn't mean that is must be built. Policy makers have the power to revert such decisions, not us.

Please respect the people of Mosta. Let's not ruin the little open spaces left.

I'd rather have the gov/local council build better pavements and good lighting on that same street, making it safer and better for everyone to enjoy.

Please respect us.
