Representation to Case Number : PA/03770/16

### Representor Details

Name : Dr Anton Bugeja  
Address : Siggiewi

Telephone :  
Fax :  
Mobile :

E-mail : antonbugeja@hotmail.com

### Representation Description :

The Archaeological Society Malta takes note of reports and tradition of megalithic remains within Mosta Fort and the surrounding area which includes the area considered for development. The relevant information is summarised on pages 18 and 19 of Storja tal-Mosta bil-knisja tagħha by E.B. Vella and others published in 1972.

As the sizable boulders in the rubble wall at the periphery of the site being applied for development is a rare testimony to the above, Archaeological Society Malta recommends preservation of this feature and any archaeological feature present within the site and surrounding area. Thank you

Dr Anton Bugeja (on behalf of Archaeological Society Malta)
