Representation Description :

Prior to granting any digging/building permit, serious archeological excavations should be done, to ensure preserving any archeological legacy forming part of the Maltese heritage. We have raped and abused the land of Malta enough to make space for more constructions. Let's ensure that we preserve what is left, as per our obligations to our children, to Malta and to Humanity, before any further irreversible damage is done. Thank you for taking responsibility for making wise choices, preserving what truly matters for the good of all.
